PERSONAL STATEMENT

Passionate about leveraging data to solve real-world problems in sports analytics. Combining a background in mathematics with hands-on experience using Hudl, Sportscode, and advanced data analysis tools, I aim to apply my quantitative and analytical expertise to enhance performance insights and decision-making in professional sport.

EDUCATION

- MSc Applied Sport Performance Analysis (Middlesex University 2025-26).
- BSc Mathematics (University of Colorado, Boulder - 2022-2025).

PROFESSIONAL EXPERIENCE

WEST HAM UNITED | *Women's First Team Analyst Placement (*August 2025 – May 2026)

- Led set piece analysis, IDP analysis, and data analysis for Women's First Team
- Used Sportscode to create opposition, individual, set piece, and post match profiles for first team meetings.
- Utilized Statsbomb and Impect data to create advanced data driven dashboards, websites, and player ratings for post and prematch analysis.

CHICAGO BLACKHAWKS | *Data Analyst Intern (*June 2025 – August 2025)

- Built a dynamic pricing dashboard (Snowflake, SQL, Python, Streamlit) to inform marketing and ticketing.
- Created an in house RAG LLM using AzureOpenAI to help make dynamic pricing decisions using in house pricing criteria and data.

AKADEMISK BOLDKLUB | *Match and Transfer Analyst Intern (*November 2023 – May 2025)

- Conducted in-depth statistical analyses of potential player transfers using large Wyscout datasets and Python for data analysis.
- Performed video analysis of set pieces and corners to optimize scoring opportunities.

DISTANCE CAPITAL MANAGEMENT LLC | *Quantitative Options Trading Intern (*May 2024 – August 2024)

- Designed and implemented a fully functional live trading platform utilizing ColdFusion, SQL, HTML, and Python.
- Leveraged Microsoft Access and IBKR API for data storage and trade execution.
- Utilized platform analytics to monitor and place trades, maintaining an expected return target of 50% annually.

TECHNICAL SKILLS

- **Programming Languages** – Python, SQL, HTML, CSS, JavaScript, Java, Kotlin
- **Databases** – Snowflake, MongoDB, Firebase, dbt
- **ML/AI** – TensorFlow, PyTorch, OpenAI, OpenAI Agents
- **Data Analysis and Visualization** – Pandas, Excel, Tableau, Matplotlib, Plotly
- **Web & App Frameworks** – Flask, Streamlit
- **Sports Performance Analysis** – StatsBomb, Impect, Wyscout, Sportscode, Hudl, Catapult SBG Focus
